

SESSION – 1 :-

Flutter Installation and Project Creation Assignment

Step 1: Verify Flutter Installation

Command:

```
flutter doctor
```

Step 2: Create Flutter Project

Command:

```
flutter create insta_clone
```

Step 3: Open Project Directory

Command:

```
cd insta_clone
```

Step 4: Check Available Devices

Command:

```
flutter devices
```

Step 5: Run the Application

Command:

```
flutter run
```

Project Structure

```
insta_clone/

```

2. Flutter Project Creation

Create Project:-

Navigate to your desired folder:

```
cd Desktop
```

Create the project:-

```
flutter create insta_clone
```

Expected output:-

Creating project insta_clone...

Resolving dependencies...

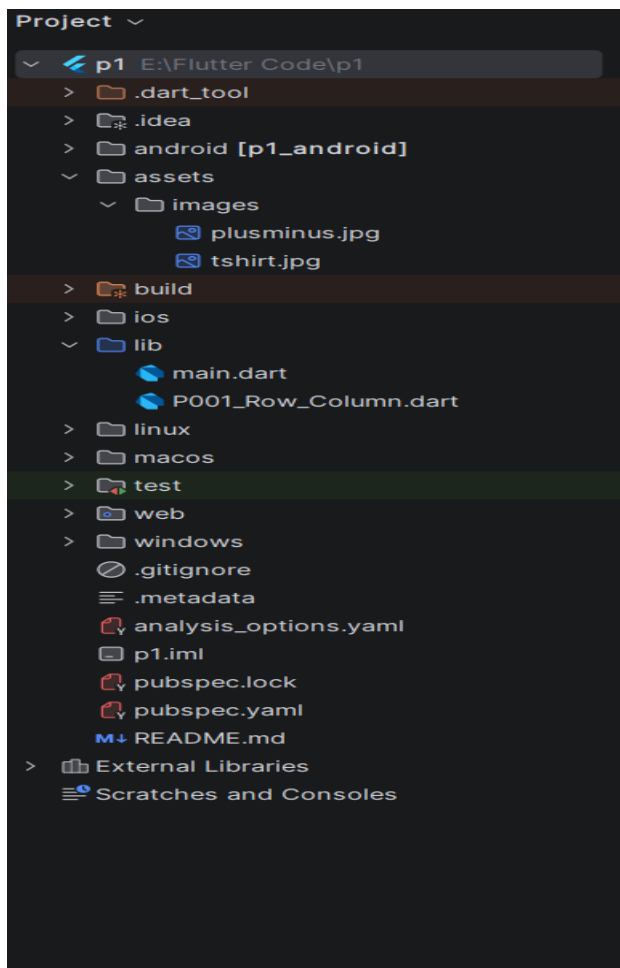

Downloading packages...

Got dependencies.

Wrote 127 files.

All done!

3. Running Application

Conclusion

Flutter SDK was installed successfully. A new Flutter project named insta_clone was created using the flutter create command, and the default Flutter application was executed successfully on an emulator/device.

GitHub Commands

```
git init
```

```
git add .
```

```
git commit -m "Flutter assignment - insta_clone setup"
```

```
git branch -M main
```

```
git remote add origin YOUR_GITHUB_REPO_URL.....git push -u origin main
```
