

App starts at SplashScreen.
 Then goes to LoginScreen.
 If isLoggedIn = true -> DashboardScreen
 Else stay on LoginScreen

```
main.dart
1 import 'package:flutter/material.dart';
2 import 'screens/splash_screen.dart';
3 import 'screens/login_screen.dart';
4 import 'screens/dashboard_screen.dart';
5
6 void main() {
7   runApp(const InstaCloneApp());
8 }
9
10 class DashboardScreen extends StatefulWidget {
11   const InstaCloneApp({super.key});
12
13   @override
14   State<InstaCloneApp> createState() => _InstaCloneAppState();
15 }
16
17 class _InstaCloneAppState extends State<InstaCloneApp> {
18   bool isLoggedIn = false; // change to true after login
19
20   void login() {
21     setState(() {
22       isLoggedIn = true;
23     });
24     Navigator.pushReplacementNamed(context, '/dashboard');
25   }
26
27   @override
28   Widget build(BuildContext context) {
29     return MaterialApp(
30       title: 'Insta Clone Shell',
31       initialRoute: '/splash',
32       routes: {
33         '/splash': (context) => SplashScreen(
34           onFinish: () {
35             Navigator.pushReplacementNamed(context, '/login');
36           },
37         ),
38         '/login': (context) => LoginScreen(onLogin: login),
39         '/dashboard': (context) => const DashboardScreen(),
40       },
41     );
42   }
43 }
```

```
main.dart
1 return MaterialApp(
2   title: 'Insta Clone Shell',
3   theme: ThemeData(
4     primarySwatch: Colors.deepPurple,
5     colorScheme: ColorScheme.fromSeed(seedColor: Colors.deepPurple),
6     fontFamily: 'Roboto',
7     appBarTheme: const AppBarTheme(
8       backgroundColor: Colors.deepPurple,
9       foregroundColor: Colors.white,
10      centerTitle: true,
11    ),
12    elevatedButtonTheme: ElevatedButtonThemeData(
13      style: ElevatedButton.styleFrom(
14        backgroundColor: Colors.deepPurple,
15        foregroundColor: Colors.white,
16        shape: RoundedRectangleBorder(
17          borderRadius: BorderRadius.circular(8),
18        ),
19      ),
20    ),
21  ),
22  // ... (routes same as above)
23 );
```

Themed App Example

All screens reflect purple theme and Roboto font.

SplashScreen (auto navigate after 2 sec)

```
// splash_screen.dart
class SplashScreen extends StatelessWidget {
  final VoidCallback onFinish;
  const SplashScreen({super.key, required this.onFinish});

  @override
  Widget build(BuildContext context) {
    Future.delayed(const Duration(seconds: 2), onFinish);
    return const Scaffold(
      body: Center(
        child: Text('Splash Screen', style: TextStyle(fontSize: 24)),
      ),
    ),
  }
}
```

LoginScreen (call login() when button pressed)

```
// inside LoginScreen build method
ElevatedButton(
  onPressed: widget.onLogin,
  child: const Text('Login'),
)
```
