

SESSION – 4 :-

Task 1: flutter doctor Output

Executed flutter doctor and identified a VS Code warning.

PowerShell - flutter doctor

```
$ flutter doctor
[✓] Flutter (Channel stable)
[✓] Android toolchain
[!] VS Code (version 1.101.0)
    x Flutter extension not installed; install from Extensions.
[✓] Android Studio
[✓] Connected device (1 available)
• 1 issue found
```

The warning indicates that the Flutter extension is missing in VS Code.

Task 2: Simulated Error

PowerShell - flutter doctor

```
$ flutter doctor
[✓] Flutter
[x] VS Code
    x Unable to find VS Code executable.
    Restore folder name or reinstall VS Code.
[✓] Connected device
```

Observed error: Unable to find VS Code executable.

Task 3: Official Flutter Documentation Fix

Install or restore VS Code and make sure the Flutter and Dart extensions are enabled. After installation, restart VS Code and run 'flutter doctor' again until the warning disappears.

Task 4: ChatGPT Prompt and Result

Error copied:

X Flutter extension not installed.

Prompt used:

"My flutter doctor shows VS Code error. Give step-by-step solution."

Steps followed:

1. Open VS Code
2. Install Flutter extension
3. Install Dart extension

4. Restart VS Code
5. Run flutter doctor again

Result:

The warning was resolved and Flutter recognized VS Code correctly.
