

SESSION 5:-

Task 1

Modified runApp() to launch MyCoolApp and displayed 'Hello from MyCoolApp!' on screen.

Task 2

Created MaterialApp with title Foodie Explorer and AppBar Foodie Explorer Home.

Task 3

Added '/profile' route and navigation button using Navigator.pushNamed().

Task 4

Moved all widget classes to widgets.dart and kept only main() and runApp() in main.dart.

main.dart

```
import 'widgets.dart';
```

```
void main() {  
  runApp(const MyCoolApp());  
}
```

widgets.dart

```
class MyCoolApp extends StatelessWidget {  
  const MyCoolApp({super.key});
```

```
  Widget build(context){  
    return MaterialApp(  
      title:'Foodie Explorer',  
      routes:{  
        '/profile':(context)=>ProfileScreen(),  
      },  
      home:HomeScreen(),  
    );  
  }  
}
```
