

```

main.dart
import 'package:flutter/material.dart';

void main() {
  runApp(const MyApp());
}

class MyApp extends StatefulWidget {
  const MyApp({super.key});

  @override
  State<MyApp> createState() => _MyAppState();
}

class _MyAppState extends State<MyApp> {
  bool isLoggedIn = false; // change this value

  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      title: 'Insta Clone Shell',
      debugShowCheckedModeBanner: false,
      theme: ThemeData(
        primarySwatch: Colors.purple,
        fontFamily: 'Roboto',
      ),
      initialRoute: '/splash',
      routes: {
        '/splash': (context) => SplashScreen(onFinished: () {
          Navigator.pushReplacementNamed(context, '/login');
        }),
        '/login': (context) => LoginScreen(
          onLogin: () {
            setState(() {
              isLoggedIn = true;
            });
            Navigator.pushReplacementNamed(context, '/dashboard');
          },
        ),
        '/dashboard': (context) => DashboardScreen(
          onLogout: () {
            setState(() {
              isLoggedIn = false;
            });
            Navigator.pushReplacementNamed(context, '/login');
          },
        ),
      },
    );
  }
}

```

Splash Screen

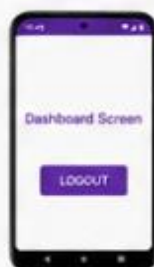

After 2 sec

Login Screen

After Login

Dashboard Screen

```

main.dart
1 return MaterialApp(
2   title: 'Insta Clone Shell',
3   debugShowCheckedModeBanner: false,
4   theme: ThemeData(
5     primarySwatch: Colors.purple,
6     scaffoldBackgroundColor: Colors.white,
7     appBarTheme: const AppBarTheme(
8       backgroundColor: Colors.purple,
9       foregroundColor: Colors.white,
10      centerTitle: true,
11      elevation: 8,
12    ),
13    textTheme: const TextTheme(
14      bodyLarge: TextStyle(fontFamily: 'Roboto'),
15      bodyMedium: TextStyle(fontFamily: 'Roboto'),
16      titleLarge: TextStyle(fontFamily: 'Roboto'),
17    ),
18  ),
19  initialRoute: '/splash',
20  routes: {
21    '/splash': (context) => SplashScreen(onFinished: () {
22      Navigator.pushReplacementNamed(context, '/login');
23    }),
24    '/login': (context) => LoginScreen(
25      onLogin: () {
26        setState(() {
27          isLoggedIn = true;
28        });
29        Navigator.pushReplacementNamed(context, '/dashboard');
30      },
31    ),
32    '/dashboard': (context) => DashboardScreen(
33      onLogout: () {
34        setState(() {
35          isLoggedIn = false;
36        });
37        Navigator.pushReplacementNamed(context, '/login');
38      },
39    ),
40  },
41 );

```

All screens use purple
AppBar and Roboto font.
